Pipe Relining Pick n Pay Head Office

After having a successful reline on certain of the full bores nearly a year ago Pick 'n Pay Head office in Kensington approached Watertight again to sort out the cause of the water damage in certain parts of the corporate building.

The damage was assessed and after doing a camera inspection, Watertight relined the affected full bores and the floor drain pipes which caused havoc during the rainy season, as the computer room had an atrium above it which continually leaked water.

The pipes were relined with our special cure-in-place structural pipe liner, creating a new pipe within the old one and in so doing leaving a watertight drain pipe on the affected areas.

Pick n Pay Head Office
Kensington

Watertight Leak Detection and Pipe Relining Company

is the guys to call before chopping the building for drain repairs! We will repair it effectively, effortlessly and without any mess.
