Pipe Relining at Skeen Boulevard - Bedfordview

Ok, so you revamp your old building and all goes to plan. Then nearing the end of the exercise you realize that one of the sewer lines are leaking which could be due to, and only since the revamp that this appeared.

NOW WHAT? This wasn't expected!

This is exactly what happened at Skeen Boulevard. The pipe was under a section of the beautifully renovated offices and exposing the pipe a this state was not an option.

The plumber on site called Watertight Pipe Relining to assist with the newfound problem. The team from Watertight lined the affected area with their structural epoxy liner through the existing Roding Eye's and the following day the building was operating as usual with no mess and no fuss. Just another satisfied customer.

Watertight Leak Detection and Pipe Relining Company

is the guys to call before chopping the building for drain repairs! We will repair it effectively, effortlessly and without any mess.
